IMPARTIAL ANALYSIS  
MEASURES "A" AND "B"

After a public hearing of the Colusa County Flood Control and Water Conservation District on April 7, 1987, the Board of Directors resolved to submit these advisory measures to the resident voters within the proposed boundaries of Zone of Benefit No. 1 within the district.

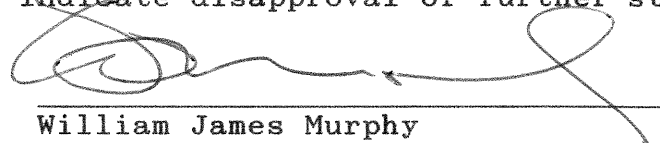

The first measure on the ballot asks whether the Board of Directors should form a Zone of Benefit. The formation of this Zone would define the area in which the work or improvement is to be performed; ie. - storm drainage. It also defines the area to be assessed to finance the improvements.

The second measure asks whether, as an alternative to forming the Zone at this time, the Board should instead expend sums from the General Fund of the county to complete further engineering feasibility and cost studies.

Both of these measures are advisory. They are an opportunity to receive from the resident voters within the proposed Zone of Benefit an expression of opinion which does not bind the Board of Directors but will assist them in determining the answers to the questions presented in the ballot measures.

A "Yes" vote on the first measure will indicate the voter's approval of the present formation of the Zone of Benefit without further studies. A "No" vote will indicate the contrary.

A "Yes" vote on the second measure will indicate the voter's approval of further studies prior to the formation of the Zone of Benefit. A "No" vote will indicate disapproval of further study.
